OUR SUSTAINABILITY GUIDELINES

Policy

Business Environment is committed to practices that integrate environmental, social and economic sustainability. We encourage and assist organisations we work with to consider sustainability in their work practices and capital works projects.

Principles

Our sustainability principles include:

- Compliance with all applicable legislation, regulations, codes of practice, and statutory authorities.
- Consideration of environmental, social and economic consequences in project and administrative decisions.
- A commitment to continual improvement of our sustainability performance.
- Promotion of staff and client awareness of our sustainability principles and practices.

Practices

We are committed to the following sustainable practices:

- Use of public transport to travel to work, attend meetings and site visits where practical.
- Use of electronic media to facilitate regular client contact.
- Locate office premises within accessible distances to public transport.
- Use of suppliers committed to sustainability practices.
- As far as practicable, use of recycled furniture and recycling of office equipment.
- Purchase fair-trade and/or organic beverages.
- Reduction of utility consumption within the workplace.
- Encourage staff to undertake voluntary work.
- Utilise recycling services for office waste, including paper and computer supplies.
- Promotion of a healthy life/work balance.
- Transparency in reporting practices to relevant stakeholders and community.
- Encourage sustainability practices for the benefit of our clients and the general business community.

Outcomes

- An annual audit of our sustainability practices will be provided via Business Environment's website.
